

## 2012 New ORC CaGBC Board Directors Candidates

Ottawa Region Chapter . Canada Green Building Council (ORC CaGBC)  
Annual General Meeting – February 23, 2012

*A proud Chapter  
of the CaGBC  
since 2007*

**DIANE BEAULIEU**, Interior Designer  
Project Manager, Tiree

Diane Beaulieu has 30+ years in the Interior Design field, working in team lead and senior positions, in commercial practice firms, as well as running her own business for over fifteen year period. Diane's previous roles have included senior level positions as the Director of Interior Design, responsible for the space planning, design development, project implementation / management and move management of large multi-phased projects, for both Public and Private Sector clients. Diane is a Registered Interior Designer (ARIDO, IDC) and holds a Bachelor Degree in Interior Design from the University of Manitoba. Through her in-depth project involvement, Diane has gained significant experience from the initial planning, budgeting and approvals process to final tenant improvements, move-in and commissioning phases. Most recently Diane is a project team member on the Algonquin College site, working towards LEED Certification for a new build.

**LAURA PAUL**, Civil Engineer  
Sustainability Analyst, Morrison Hershfield

I'm very passionate about sustainability— living in a condo in a dense community, eating a plant based diet (vegan), and using only walking/biking/public transit for transportation.

I believe there is a large need and opportunity to support the Ottawa CaGBC Chapter in encouraging students and new professionals in the Green Building Industry, by organizing fun/informative/hands-on events focused for this demographic. My goal, if elected, is to help create a solid framework for the ongoing succession of an active Emerging Green Builder (EGB) Group within the CaGBC Ottawa Chapter, increasing EGB and Chapter membership. I also have the support of my company, Morrison Hershfield, where I currently work as a Sustainability Analyst - including LEED Consulting, and LEED Assessment work (NC, CS, and EBOM). I believe I can also bring the perspective of the General Contractor to the Board, as I previously I was employed by PCL, both as a Field Engineer on a LEED Gold Project, as well as working in their Sustainable Construction Department supporting projects across Canada and the US. I obtained my Bachelors of Science in Civil Engineering, and am a LEED AP BD+C/LEED AP O+M. I am currently Chair of both the National CaGBC EGB Committee, as well as the recently re-established EGB Group here in Ottawa; previously I was the Chair of the EGB Group in Greater Toronto. Thank you for the consideration.

## 2012 New ORC CaGBC Board Directors Candidates (cont.)

*A proud Chapter  
of the CaGBC  
since 2007*

**DANIEL ROY**, Consulting Engineer  
Mechanical & Electrical Regional Director, Cima Canada Inc.

As senior partner of CIMA+ and regional director of Mechanical-Electrical department, Mr. Roy has led key electromechanical engineering projects, as designer and project manager. He participated in studies on energy conservation and has proven skills in computer-assisted energy consumption simulations design of hundreds of building mechanical systems for plumbing, fire-protection, heating, cooling, ventilation, air conditioning & automatic controls and instrumentation; and construction site supervision. Mr. Roy, Leed AP, has actively participated in the Leed certifications of the following projects:

1. Place Chez Henri (Leed Gold)
2. Starbuck, Ottawa (Leed Certified)
3. Lifestyle, Ottawa (Leed Certified) and others

**JOEY ST. JACQUES**, Facilities Management  
Facilities Supervisor, Hydro Ottawa

I have been employed with Hydro Ottawa for the past twenty-three years in various capacities, but always with a consistent focus on client satisfaction and quality control. In addition to my successes at Hydro Ottawa, I have also had the opportunity to own and manage a successful business and sit on various Boards in the city of Ottawa. This experience has provided me with the opportunity to acquire Board of Directors training, and to gain invaluable experience in managing a business worth over \$100 million dollars.

- Successfully managed various Hydro Ottawa construction projects totaling \$50 million dollars.
- Nominated for Corporate Social Responsibility Award at the Human Resources Summit Award-Toronto
