

# Green Associate Exam Kickstarter

**DELIVERY:** WORKSHOP | **DURATION:** 1 DAY | **COST:** FROM \$275

**READY TO TAKE THE NEXT STEP IN YOUR CAREER?** Earn the internationally recognized LEED® v4 Green Associate credential to equip you with important foundational information on green building principles and practices. Delivered by highly-qualified instructors with real-life experience, this course will provide you with valuable knowledge and give you access to quality study tools. Network with, and learn from, other individuals with similar goals, as you learn what you need to know to pass the Green Associate Exam.

## Course Highlights

This one-day intense workshop covers the information necessary to successfully prepare for the LEED Green Associate exam including:

- » Various LEED rating systems, categories and minimum program requirements;
- » LEED certification process, requirements, strategies and intents of the numerous LEED credits;
- » Overall intent of the LEED prerequisites and credits;
- » Tips on studying and exam writing skills

The in-class portion of this course provides participants with foundational information which will be followed up with a study plan to help maximize the information you have learned, including reference material and study resources.

## Who should take this course?

This course will appeal to architects, engineers, interior designers, project managers, real estate agents, contractors and sub-trades, manufacturer representatives, students, and others interested in the credential.

## WHY CaGBC?

CaGBC is a proven training expert in the field of green building, with thousands of individuals having taken CaGBC education. Our courses provide current and relevant information, while our faculty are carefully selected experts with practical industry experience who are able to provide in-depth knowledge and real-life examples.

**CONTACT US!** **PHONE:** 1-866-941-1184 | **EMAIL:** [education@cagbc.org](mailto:education@cagbc.org) | **WEB:** [www.cagbc.org/education](http://www.cagbc.org/education)

### Upon completion of this workshop participants will be able to:

- » Explain the various LEED rating systems, categories and minimum program requirements;
- » Describe the LEED certification process (organizations, structure of rating systems, certification process etc.);
- » Discuss a number of the intents and general strategies of the numerous LEED v4 BD+C credits and prerequisites;
- » Differentiate between many of the referenced standards used by LEED, such as ASHRAE Standard 90.1-2010, Green-e Energy product certification, and the California Department of Public Health Standard Method v1.1-2010;
- » Recognize synergies between the various LEED credits;
- » Identify:
  - » strategies to promote the use of alternative transportation;
  - » best practices for achieving a sustainable project site;
  - » appropriate water saving strategies;
  - » strategies related to energy efficiency;
  - » life-cycle impact of products and materials on a project and the environment that promotes resource efficiency; and
  - » building design process and operations with an impact on indoor environmental quality.

### Included Materials:

- » 90-days access to 400 online practice questions and a hard copy of the presentation slides
- » Robust study guide (PDF) and 101 practice questions and answers (PDF)
