

ON DEMAND

Course Pre-requisite: It is recommended that you have the LEED Green Associate credential and/or have completed a Green Associate prep course.

Upon completion of this course, participants will be able to:

- » Explain the scope and project types that are eligible for certification through the LEED v4 Building Design and Construction (BD+C) rating system.
- » Recognize the differences and applicability between the eight rating system adaptations within LEED BD+C.
- » Describe the requirements and strategies for each credit, prerequisite and minimum program requirement for the LEED BD+C rating system.
- » Solve key calculations for various LEED BD+C credits and prerequisites and;
- » Name synergies between credits, and discern the relevant data that applies to a given credit.

Building Design and Construction Exam Prep Course

DURATION: Self-paced, 90 day access

Course Highlights

This self-paced online course will help to prepare you for the LEED® Building Design and Construction (BD+C) Exam. You will gain access to CaGBC Central, our online learner platform, for a period of 90 days. This course will provide a technical analysis of the LEED BD+C rating system, starting with a review of the LEED project team and certification process. It also delves into the credit requirements, calculations, and synergies among credits for each of the credit categories. In addition to video modules, you will be provided with a copy of the presentation slides (PDF), at a glance study sheets (PDF), and 100 online exam practice questions. You will also gain access to our discussion forum as well as scheduled live Q&A webinar sessions with one of our expert instructors.

Instructor

JAMES FURLONG, Managing Principal, MCW Group of Companies. James has a technical background in mechanical design and energy efficiency and has been a sustainable design practitioner for 14 years. His practice focuses on sustainable building design and operations; coordinating a global, multidisciplinary group of architects, engineers, and technologists with a focus on high performance, energy efficient built environments. James has experience working on several LEED Platinum and net-zero projects, and is active in the energy retrofit industry as a Certified Energy Manager.

I WILL LEAD WITH CaGBC EDUCATION

CaGBC is a proven expert in the field of green building. Our courses provide the most current Canadian content, with faculty who are carefully selected for their practical industry experience, and ability to provide in-depth knowledge and real-life examples.
