LEED Technical Bulletin

August 2013

[Subscribe to the LEED Technical Bulletin | Version Français](#)

ATTENTION – Members of the CaGBC shape the green building industry through committee participation, balloting and leveraging the opportunity to sit on Chapter and National Boards. Moving forward, as a new member benefit, only CaGBC National and Chapter members will receive the LEED Technical Bulletin. [Click here to learn about the benefits of becoming a CaGBC member](#) and get more involved in your industry.

Learn what LEED v4 means to Canadians

Having successfully passed ballot, the US Green Building Council will be launching LEED v4 before the end of the year. The CaGBC has been actively involved in development and is now formulating Alternative Compliance Paths (ACPs) that will ensure LEED is easily applied to Canadian projects.

To keep you updated on what LEED v4 means for Canadians, we've created a web page to bring you the latest information and support tools. [Learn about the new rating systems, ACPs, and improvements to the user experience.](#)

There are a number of further improvements coming with LEED v4, including web-based reference guides and simplification of the documentation and submittal requirements. CaGBC will be posting new information as it becomes available, so check back regularly and be sure to read our LEED Technical Bulletins, free to all National and Chapter members - to sign-up, simply [send us an email](#).
