# 5 Green Building Courses Employers Want You To Take

# 72%

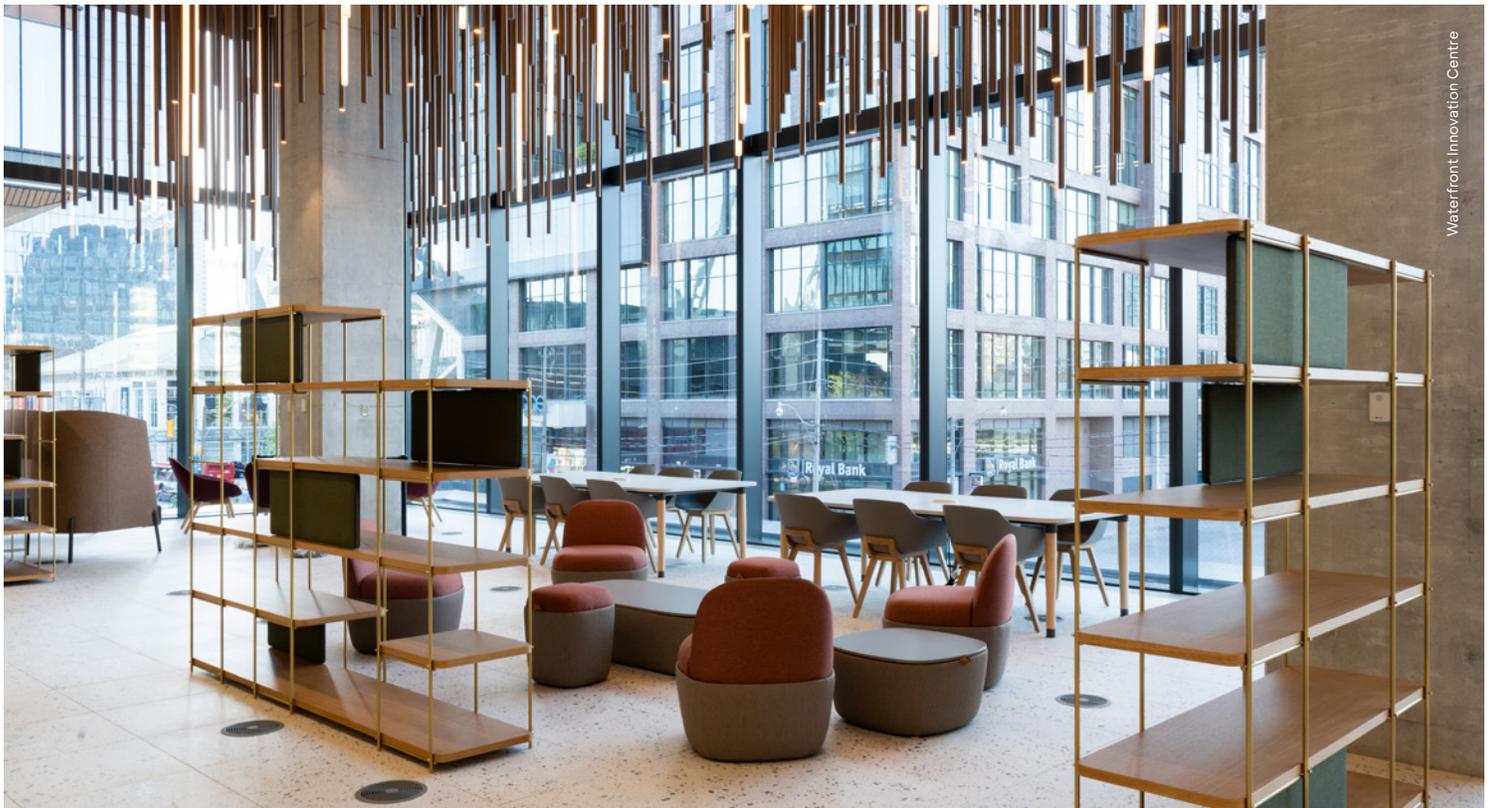

## of employers practice skills-based hiring, prioritizing credentials.<sup>1</sup>

Green building is the key to unlocking a better bottom line. And employers want workers who can help them do it.

---

The question is...will you spare as little as 60 minutes to accelerate your career trajectory?

Here's how to start — for free! [➤](#)

## 1. Requirements of Zero Carbon Transition Plans **TRY FOR FREE!** ↗

Gain an understanding of Zero Carbon Transition Plans, a strategic process for reducing operational emissions, featuring Canadian experts in deep carbon retrofits.

**Duration: 1.5 hrs**

## 2. Strategies for Reducing Thermal Energy Demand Intensity ↗

Learn design and process strategies for reducing thermal energy demand intensity (TEDI), including envelope, building massing and orientation, and ventilation system strategies.

**Duration: 90 minutes**

## 3. ESG Standards for the Building Industry ↗

Be introduced to Environmental, Social, and Governance (ESG) principles and their pivotal role in the building industry, focusing on low-

carbon buildings and green building practices to mitigate climate change and reduce greenhouse gas (GHG) emissions.

**Duration: 60 minutes**

## 4. Low Embodied Carbon Designs and Materials ↗

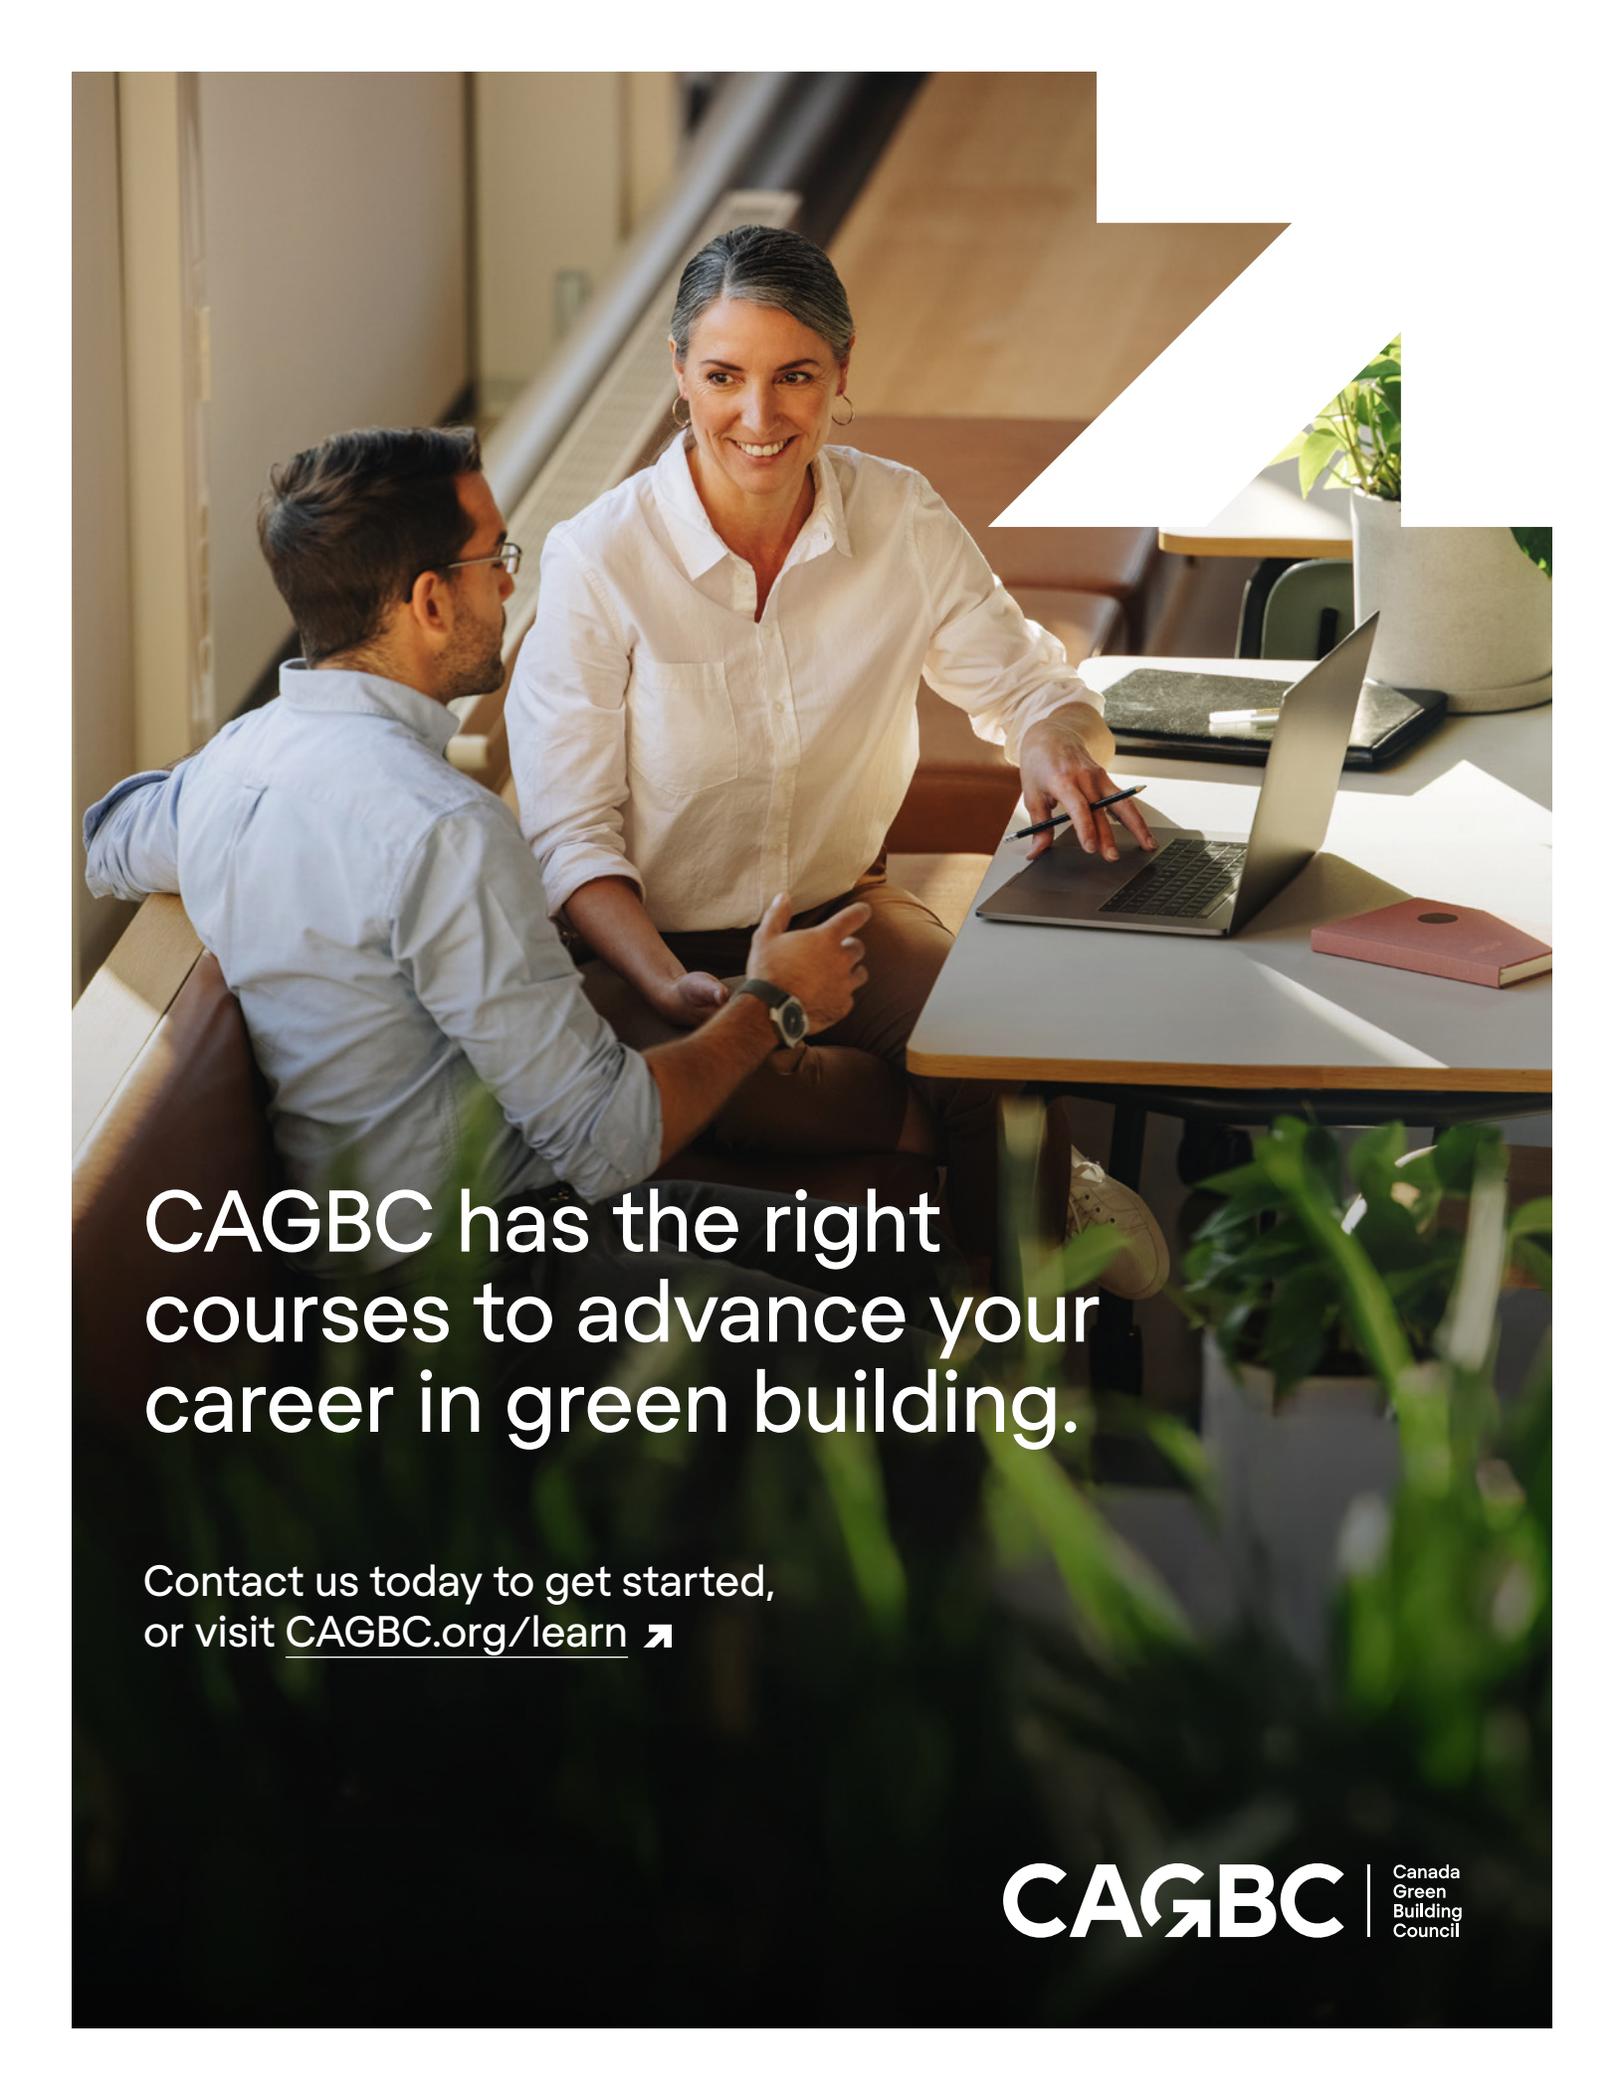

Gain valuable insights from industry experts, explore reduction strategies, and learn to make informed decisions for sustainable, low-carbon buildings.

**Duration: 3.5 hours**

## 5. Energy Efficiency in Building Design and Management ↗

Explore various approaches to enhance energy efficiency in building design and operations with practical insights, case studies, and strategies to navigate the evolving landscape of energy efficiency in the built environment.

**Duration: 4.75 hours**

CAGBC has the right  
courses to advance your  
career in green building.
